

Turf King

Product # 322

Emulsifiable concentrate with Prometon

A non-selective, total kill herbicide designed for use where control of all vegetation is desired. Since most of the activity is done through the roots, it is emulsifiable and requires adequate rainfall to move the herbicide into the root zone. It is only recommended for non-cropland areas away from residential/recreational areas, outside of the dripline of trees and away from the roots of desired plants, brush, foliage and trees.

Non-Selective Herbicide With Residual control:

- Along pipelines
- Around buildings
- Industrial sites
- Railroad rights-of-way
- Loading ramps
- Parking lots
- Fence rows
- Storage yards
- Tanks farms

Features and Benefits

- Quickly and effectively eliminates all vegetation
- Under normal conditions, a single application stops weed from coming back for one growing season
- Ideal for use on non-cropland area
- The degree of control and duration depends on the amount of herbicide applied, soil type rainfall and other conditions

Properties

Appearance..... Reddish-brown liquid
 Fragrance..... Fuel oil
 Concentrate..... Yes
 lash point..... 123 ° F

Directions

Complete directions on product label

Typical Application: Mix 1 gallon with 10 gallons of water and apply over 1000 sq ft.

Hard to control weeds: For hard to control perennials and grasses such as johnsongrass, bindweed and wild carrot, use 3-4 gallons mixed with 10 gallons water per 1000 sq ft.

Authorizations: EPA registered product.

Ingredients

	Amount
