

This snow plow coating deposits a hard, slippery layer of silicone on plow blades and other snow removal equipment. Snow slides off treated surfaces easier and faster, allowing more snow to be moved with less fuel and less wear on equipment. In addition, the impervious silicone layer protects metal surfaces from rust and corrosion both in use and in storage.

DIRECTIONS

Apply coating to plow blades and other exposed metal and painted surfaces by spraying, brushing or rolling.

Equipment may be used immediately after application, but best results are obtained when coating is allowed to dry for 30 minutes.

For maximum rust protection, apply coating at the end of each work period. Several applications over the summer storage periods will preserve equipment from corrosion.

This snow plow coating is ideal for use on shovels, loaders, snow throwers and truck beds to help prevent corrosion and allow easier, more complete dumping.

SNOW PLOW COATING

PROTECTS AGAINST
RUST AND CORROSION

REDUCES FRICTION FOR
MORE EFFICIENT PLOWING

CAUTION – COMBUSTIBLE

Harmful or fatal if swallowed. Keep away from heat or open flame. See side panel for additional cautions and first aid instructions.

KEEP OUT OF REACH OF CHILDREN

Sold By:

CAUTION – COMBUSTIBLE

Harmful or fatal if swallowed. Keep away from heat or open flame. Contains petroleum distillates. Avoid contact with skin, eyes or clothing. Use only with adequate ventilation.

FIRST AID

External – Wash with soap and water.

Internal – Do NOT induce vomiting. Call physician immediately.

Eyes – Flush eyes and under eyelids with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical attention.
