Clean dispensing system lines are essential to serve the best tasting beer and wine. Use Richco® COIL CLEANER Powder Detergent to make these dispensing systems absolutely clean, so beverages keep their natural aroma and true flavor. Regular cleaning of dispensing lines, taps and faucets will assure that your beer and wine taste and smell fresh and appetizing every time!

DIRECTIONS FOR USE

The amount of cleaning solution needed is determined by the length of the beer/wine lines. For short lines, 1 quart is sufficient. Longer lines will require 2 to 3 quarts.

Use 1 to 2 ounces of Richco® COIL CLEANER Powder Detergent per quart of warm or cold water. Pump the cleaning solution through the lines, and then rinse with cold water or beer. To clean faucets, disassemble and soak in cleaning solution, then rinse faucet parts with clean water.

WARNING

Harmful if swallowed. Contains sodium metasilicate. May cause burns. Avoid contact with eyes, mucous membranes, skin or clothing. If splashed in eyes, flush eyes and under eyelids with plenty of cool water and obtain immediate medical attention. If on skin, flush with water. If swallowed, DO NOT induce vomiting. Give several glasses of citrus fruit juice followed with water and call a physician immediately.
